

ANDRII FETISOV

JUNIOR DATA ANALYST

Piglio (FR), Italy | +48 575894566 | Telegram: +38093 7449137 | oknafetisov777@gmail.com

LinkedIn: <https://linkedin.com/in/andrii-fetisov> | GitHub: <https://github.com/AndriiFetisov>

SUMMARY

Junior Data Analyst with practical experience in SQL, Python (Pandas), and data visualization tools (Tableau, Power BI). Experienced in analyzing datasets, building dashboards, and performing cohort and user behavior analysis. Able to transform complex data into actionable business insights and support data-driven decision-making processes.

HARD SKILLS

SQL, Python (Pandas, NumPy), Data Analysis, Data Cleaning & Validation, Exploratory Data Analysis (EDA), Data Visualization, Statistical Analysis, A/B Testing, Cohort Analysis, Funnel Analysis, Business Metrics (Conversion Rate, ARPU, LTV, Retention, Churn), Data Storytelling.

TOOLS

SQL, BigQuery, PostgreSQL, Tableau, Power BI, Excel, Google Sheets, Python (Pandas, NumPy), Jupyter Notebook, Looker Studio, Matplotlib, Seaborn.

SOFT SKILLS

Analytical thinking, Problem-solving, Communication, Attention to detail, Stakeholder communication

PROJECT EXPERIENCE

-User Retention Analysis (SQL Cohort Analysis)

<https://github.com/AndriiFetisov/retention-analysis-cohort-analysis>

Technologies: SQL, BigQuery, Google Sheets

Description: Performed cohort-based analysis to evaluate user retention, identify churn patterns, and analyze conversion funnel performance.

Key responsibilities: Conducted cohort analysis to evaluate user retention. Built cohort tables and calculated retention KPIs (Day 1, Day 7, Day 30 retention). Analyzed differences between user segments (promo vs organic). Defined key product metrics (retention, conversion, churn).

Result: Identified retention gaps and provided data-driven insights to improve user acquisition quality and retention strategies.

-Stack Overflow Survey Analysis (Python)

<https://github.com/AndriiFetisov/stack-overflow-survey-analysis>

Technologies: Python (Pandas), Jupyter Notebook

Key responsibilities: Cleaned and processed dataset of 49K+ records. Performed exploratory data analysis (EDA). Identified trends in salaries, tools, and developer behavior.

Result: Extracted insights from real-world data to support analytical conclusions.

-User Engagement Dashboard (Tableau):

https://public.tableau.com/app/profile/andrii.fetisov/viz/home_work3_17493968755740/Dashboard1

Technologies: Tableau

Key responsibilities: Built an interactive dashboard to analyze user engagement and activity. Visualized key metrics such as DAU/MAU, session duration, and user engagement trends. Analyzed user segments and behavior patterns. Designed filters for dynamic data exploration.

Result: Identified key engagement trends and user behavior patterns to support decision-making.

WORK EXPERIENCE

Truck Driver

SACHS TRANS & SEMENOV TRANSPORTE | 2020–2026

Responsibilities:

- Delivered goods across international and domestic routes
- Planned routes considering deadlines and fuel efficiency
- Monitored vehicle condition and performed basic maintenance
- Handled transport documentation (CMR, waybills)
- Ensured compliance with safety regulations and schedules

Achievements:

- Reduced fuel consumption by ~12% through route optimization
- Achieved 98% on-time delivery rate over the last year
- Maintained a clean driving record with zero accidents

Private Entrepreneur (Retail) | 2011–2020

Responsibilities:

- Managed retail operations (purchasing, sales, pricing)
- Analyzed market demand and adjusted product assortment
- Negotiated with suppliers and managed partnerships
- Controlled finances, expenses, and profitability
- Provided customer service and improved client experience

Achievements:

- Increased business profit by ~25% through assortment optimization
- Expanded customer base by 40% by improving service quality
- Reduced purchasing costs by 15% through supplier negotiations

CNC Milling Operator JSC Hydrosila | 2009–2011

Responsibilities:

- Operated CNC milling machines
- Set up equipment and adjusted machining parameters
- Read technical drawings and performed basic programming
- Conducted quality control and measurements of parts
- Followed production standards and safety procedures

Achievements:

- Reduced defect rate by ~20% through precise machine setup
- Improved productivity by 15% by optimizing workflows
- Quickly learned new equipment and trained new employees

EDUCATION

• **GoIT** — Data Analytics (2025–2026)

• **Kropyvnytskyi Engineering College of the Central Ukrainian National Technical University** — Junior Specialist, Tool Manufacturing (2003–2007)

• **Central Ukrainian National Technical University** — Bachelor's Degree, Mechanical Engineering (2007–2009)

LANGUAGES

English — Upper-Intermediate | **Polish** — Pre-Intermediate | **Ukrainian** — Native | **Italian** — Beginner | **Russian** — Fluent
